

Historic Beaver Lake, the Mississippi Flyway, and the ongoing saga of the aquatic invasives... and how they go together at Willow Slough Fish and Wildlife Area!

April 17-18

Willow Slough Fish and Wildlife Area, Morocco

8:30—3:00 (CST) both days

Lunch and \$300 worth of materials provided

Bring your binoculars and waders to this two-day workshop at the site of historic Beaver Lake, at one time the largest lake in Indiana. With its prime location in the Mississippi Flyway and a lake that's been successfully restored four times, Willow Slough Fish and Wildlife Area in Morocco, Indiana is a rich fishery and migration stopover. It's also a great place to learn ways to use wetlands for hands on study and birding. Join Indiana Projects WET and WILD for this workshop featuring Project Webfoot and Flying WILD, wetlands and bird curricula for educators grades 4-6. The workshop will include an overview of the history of Willow Slough, trips to, in and around the property and tips on how to plan a successful class field trip. Background information on wetlands, beginning birding techniques and migration-related activities will be covered.

Through a generous sponsorship by Ducks Unlimited, participants will receive curriculum materials (\$300 value) and lunch both days at no cost. To register, contact the Natural Resources Education Center at 317-562-1338 or at nrec@dnr.in.gov. Registration deadline is April 8.

Flying WILD provides an introduction to bird biology, identification and migration. All curricula employ hands-on activities that can be used in the classroom or outside. Please visit www.flyingwild.org.

Project Webfoot is a wetlands education program that includes the WOW! The Wonder of Wetlands Educators Guide. Project Webfoot curriculum and materials include background information, lessons and techniques for teaching about wetlands. Please visit www.projectwebfoot.org.
